

TUTIS VReddo Update

9th June 2021

TUTIS VReddo are debuting a virtual reality showcase of their TUTIS_ENTERPRISE product across two live events in Perth: Austmine & the Australian Petroleum Production & Exploration Association (APPEA) Conference & Exhibitions.

We caught-up with CEO Chris Wright after the first of these events - Austmine. “It was fantastic to reconnect with everyone across the mining and processing industry to develop a more acute sense of current market trends. There certainly was an explosion of innovation on display, from a wide range of suppliers: sensors, software automation and analytics were particularly in evidence. Of course a recurring theme was the shortage of skilled labour, how to mitigate this and make best use of existing workforce capability - the later is certainly something TUTIS_ENTERPRISE can help with.”

“The VR showcase we premiered was really well received and helped create a suite of new Enterprise leads we’re now busy progressing. We’re now really looking forward to exhibiting at APPEA next week to reconnect and get up to speed on all goings-on within the oil and gas industry”.

TUTIS VReddo will be participating in APPEA in Perth from the 14th to 17th of June.

Perth based Funding Strategies clients are welcome to attend APPEA as a guest of TUTIS VReddo where they can demonstrate the Virtual Reality aspects of the platform first hand.

Contact Funding Strategies today for an introduction to meet with TUTIS VReddo CEO, Chris Wright, in Perth.

About TUTIS VReddo

TUTIS VReddo provide cloud plus virtual reality workforce training & compliance software products. Virtual Reality modules include a LIVE, instructor-lead, simulated training workshops platform and practical, task-based VR training labs to deliver a fully-immersive and interactive student experience. TUTIS VReddo is born out of the need to make workforces more agile and productive using technology: more detailed tracking of competencies; more effective competency-based training; and much more effective remote training. The team is passionate about delivering compliance assured.
