FUNDING STRATEGIES NEWSLETTER

Instant Consult Growth

2020 was a phenomenal year for Instant Consult. Now conducting approx. 10,000 consults a month, the Instant Consult app is servicing more telehealth consultations per month than any other practice in Australia. Since our last Newsletter with Funding Strategies, Instant Consult has grown by 10X.

Launched in 2018, Instant Consult could not have been positioned better for the timing of COVID-19 and what this meant to users across the country. Telehealth being encouraged by government, adopted by doctors and utilised by patients, it was a perfect storm to see Instant Consult reach its potential in a very short amount of time.

Now with more than 100 GPs and over 80,000 patients and growing, who use the service again and again, Instant Consult offers its users the ultimate convenience whilst keeping them safe during the pandemic and ultimately what we must be prepared for moving forward.

Through Instant Consult's bespoke technology, frontline workers have been given the opportunity to stay in work, reduce the risk of transmission, assist patients remotely, and continue to earn. All at the same time, patients all over Australia have had access to Instant Consult's Australian registered, fully qualified and experienced doctors at just a tap of a button.

Kind Regards,

Travis Brown
Director
