Opmantek Signs another Major Telecommunications Provider

Another major South American telecom provider has signed a 3 year agreement to use Opmantek's award winning NMIS software. This latest carrier, from Ecuador, will join carriers from many countries in North America, South America, Central America, the Carribean, the Pacific and Europe in using Opmantek's products to monitor their internal and customer facing Network Infrastructure.

"The take-up of our products by large national and multi-national carriers has far exceeded our expectations. We have successfully commercialized NMIS into a product that can truly compete against the biggest competitors in the world" Says Danny Maher, Opmantek CEO. "I am looking forward to further successes in South America and with other carriers from around the globe"

Opmantek develops innovative network management software that is used by some of the world's largest telecommunications organisations. Over 45,000 organisations use Opmantek software.
