

Company Announcement Wednesday 22 February 2017

Minimum Subscription Amount

Tailored Superannuation Solutions Ltd (“TSS” or the “Company”) is pleased to confirm that the minimum subscription amount for its capital offer to investors has been exceeded.

Limited parcels remain available under this single offer round.

While TSS is maintaining strict confidentiality about the businesses with which it is in discussions, including funds and industry providers along the supply chain, the New Year has commenced with a rush of interest. During these first few weeks, we have had a series of meetings in Brisbane, Melbourne, Sydney and Canberra to progress discussions towards the introduction of Trustee Tailored Super as the world’s first Smart Default. Further details are available in the [Funding Strategies monthly newsletter](#).

This injection of funds will provide the Company with the capital required to continue the progress already made with market introduction activities, including beta client testing, as outlined in the Implementation Blueprint and Offer Document.

Trustee Tailored Super automatically tailors superannuation default members’ investment options to their retirement lifestyle prospects. It significantly improves the efficiency by which contributions are invested compared to the current ‘one-size-fits-all’ single investment option approach.

This results in an uplift of 35+% in retirement balances and managed sequencing loss risk as retirement approaches, for approximately 80% of working Australians. TTS delivers direct and tangible benefits for millions of default fund members, as well as broader public policy benefits for all Australians.
