## **OPMANTEK SOFTWARE VOTED PEOPLE'S CHOICE FOR SYSTEMS MANAGEMENT IN 2015 AMERICAN BUSINESS AWARDS<sup>SM</sup>**

Friday, 14th August 2015

Opmantek Software has been voted America's favourite systems management product in The 13th Annual American Business Awards.

Opmantek's newest accolade was awarded based on public vote and is a testament to the growing popularity of their network management solutions both in the US and worldwide.

More than 16,000 votes were cast in 40 people's choice categories. Opmantek are one of the most popular business software companies in their field with over 60,000 organizations using their products, which saw them receiving popularity during voting and clinching the award ahead of runner up Dell.

"It's another special award for Opmantek." said Opmantek CEO Danny Maher. "The Opmantek team works hard to provide quality products to our global community of users. I am grateful to all the people that love our software and thank them for making the effort to vote for us".

Opmantek provide commercial open source network management and IT audit software that helps IT teams detect and manage any device connected to their network, identify network faults, review current and historical network performance, and predict where future failures are likely to occur.

Rich Bywater, Opmantek's VP of Sales in North America was thrilled with the win "It means a lot that people have taken the time to vote for us in the most prestigious awards in the U.S." he said. "The Opmantek business has been growing rapidly here in the U.S. We have an enormous community of over 15,000 users and we are proud to provide high-grade, high-scale software, which saves our customers money."
