

OPMANTEK

OPMANTEK SECURE 3 YEAR DEAL WITH U.S. TELCO

Monday, 23 February 2015

Opmantek Ltd (ASSOB: OMK) continue to break new ground in international markets with the signing of a 3 year contract to provide software and support services to a major telecommunications company in the US.

This is the first deal of it's size to be achieved by Opmantek in the US and was largely influenced by the new features and performance delivered in the upgraded versions of their flagship network management platform – NMIS.

US interest in Opmantek products and services has been on a heavy increase with the NMIS product suite emerging as an easy to implement and cost effective solution that is particularly powerful in complex MSP/ISP networks or highly distributed enterprises.

Opmantek will be relisting on the primary board next month to raise growth capital in order to accelerate their expansion and establish sales teams in each of their key regions. All enquiries should be directed to Mark Rainbird at BlueMount Capital (ph: +61 7 3160 2840, email: brisbane@bluemountcapital.com)
