

OPMANTEK

OPMANTEK ANNOUNCED AS FINALIST IN THE AMERICAN BUSINESS AWARDS

Monday, 25th May 2015

Off the back of further significant success in USA, Opmantek (ASSOB:OMK) has been announced as a finalist in the American Business Awards.

Opmantek has been selected as one of 6 finalists in what is considered to be America's preeminent business awards program. Final judging will take place later this month.

Opmantek established USA operations in mid 2014 to service the demand from high scale organisations including some of the USA's largest telecommunication providers, managed service providers and banks. Fifty per cent of Opmantek's enquiries now come from the US market where Opmantek's low cost, high scale, high feature alternatives to the multi-million dollar systems that currently dominate the US market are under high demand.

"Opmantek is winning many [awards](#)* around the world and Opmantek software is under high demand globally" said Opmantek CEO Danny Maher. "We have significant intellectual property and customer traction – I look forward to deploying the funds we are raising and making the most of the high demand we are receiving from the market."

Every 6 minutes a new organisation implements an Opmantek product**.

Opmantek has launched a growth capital raise, for investment enquiries please contact Mark Rainbird at BlueMount Capital (ph: +61 7 3160 2840, email: brisbane@bluemountcapital.com)
