OPMANTEK RELEASES OPEN-AUDIT ENTERPRISE

Opmantek (ASSOB:OMK) continues its exciting and rapid release schedule with Open-Audit Enterprise.

Opmantek Acquired Open-Audit in January 2013 with a plan to release an enterprise version of the product and cross-sell their existing NMIS technology.

Open-Audit is the world's leading open source network audit platform, used by over 25,000 businesses worldwide. New features of Open-Audit Enterprise include an improved GUI, Software Asset Management, Mapping, and Scheduled Reporting.

“Further development of Open-Audit's key features, aimed at attracting additional commercial awareness from the already growing enterprise market, was a priority target since the acquisition in January” says Opmantek CEO Danny Maher.

With over 45,000 businesses now using Opmantek products, including some of the biggest names in the telecommunications world, the business is continuing through an exciting period of high growth.
