

OPMANTEK

OPMANTEK REACHES AGREEMENT FOR BRAZIL AND VENEZUELA

Opmantek (ASSOB:OMK) and Venezuelan ICT services provider, Anew, have partnered to provide network management and support services in Brazil and Venezuela.

Anew is tightly aligned with a variety of major vendors and key Opmantek prospects.

Mr Maher, Opmantek's CEO said "Anew is a perfect partner for Opmantek. We are close to some key customer agreements in Venezuela which require a reputable local partner to transact and we are facing substantial demand within Brazil where we need a local partner to respond."

Government policy in both Brazil and Venezuela stipulates a commitment to using open source products. These commitments represent a significant opportunity for Opmantek's commercial open source business model.

Opmantek takes pride in its worldwide customer base and is especially pleased with how strongly the product set has been adopted in Latin America.
