OPMANTEK

IMPLEMENTED ON WORLD'S FASTEST MOBILE NETWORK

Opmantek (ASSOB:OMK) has implemented their latest version of NMIS, (v8.4.2G), on one of the world's fastest network' in record time.

One of Europe's largest mobile networks, has joined Opmantek's blue-chip customer base by implementing the increasingly popular NMIS suite which ties together Opmantek's commercial and open-source products.

CEO Danny Maher says that "with the latest release of version 8.4.2G, NMIS is now quicker and easier to roll out in high scale networks than ever before. Remote access, expert staff and fantastic cooperation means Opmantek can implement NMIS with minimal impact to standard network operations."

With over 45,000 businesses now using Opmantek products, including some of the largest names in the carrier space, the business is continuing to exceed expectations.
