OPMANTEK LOOKS TO BRAZIL TO EXPAND GLOBAL FOOTPRINT

Monday, 10th October 2016

Opmantek continues to experience strong growth and has further expanded their team in an attempt to capitalize on high demand from Brazil.

Latin America is a strong market for Opmantek, where Telco's in every country of Central America use Opmantek software. Opmantek established an office in Mexico City to lead the region and is reaping the rewards from that investment. To commence looking at the Brazilian market Opmantek has hired their first Brazilian executive and will lead the plans from Mexico City and work with key partners in Brazil.

"Brazil has always been a strong market for us" said Opmantek General Manager, Sharon Hunneybell "we have an enormous amount of demand from Brazil and have not been able to effectively service that demand until now".

Brazil has a population of 200 Million people and strong government policies around open source software. Every day 20 new Brazilian companies implement Opmantek software.
