OCULAR ROBOTICS LIMITED (ASSOB: OCR)

- **Ocular Robotics Receives Order for its 3D Scanning Technology From US Army**

Ocular Robotics has received an order for its 3D scanning product from the US Army, the Company's first order from the US Government sector. The fact that this order originated from a recommendation made by an OCR customer who had previously purchased a 3D scanning system makes it all the more satisfying.

The company looks forward to continuing strong momentum in its current capital raise to fund significant growth in its sales and marketing efforts. Enabling the benefits of OCR's products to be brought to as wide a customer audience as possible, who will no doubt recognize, as the US Army did the ground breaking advantages offered by Ocular Robotics products.
